

# AYE NYEIN SAN

## Full Stack Developer / Backend Specialist

**Address:** Pazundaung Township, Yangon, Myanmar | **Email:** aye nyeinsan933@gmail.com  
**GitHub:** github.com/ayenyeinsan226 | **Phone:** +95 9 761818170

### PROFESSIONAL SUMMARY

Results-driven and highly adaptable Software Engineer with comprehensive experience in backend development and emerging full-stack proficiency. Formally educated with a Bachelor of Computer Science from UCSY, demonstrating strong core foundations in systems architecture, data structures, and clean coding practices. Possesses robust technical expertise in building scalable web applications using Node.js, Express, TypeScript, PHP (Laravel), and C# (ASP.NET). Adept at transforming complex business requirements into high-performance server-side systems, optimizing databases, and collaborating effectively in cross-functional teams. Committed to continuous professional development, currently expanding advanced technical and professional communication competencies to deliver immediate high-impact solutions.

### TECHNICAL SKILLS

|                    |                                                                                |
|--------------------|--------------------------------------------------------------------------------|
| Languages          | TypeScript, JavaScript (ES6+), PHP, C#, SQL, HTML5, CSS3                       |
| Backend Frameworks | Node.js, Express.js, PHP (Laravel), C# (ASP.NET Core)                          |
| Frontend Core      | React, React Native (Actively Advancing)                                       |
| Databases & Tools  | MySQL, MongoDB, REST APIs, GraphQL, Git, GitHub, Postman                       |
| Methodologies      | MVC Architecture, Object-Oriented Programming (OOP), Unit Testing, Agile/Scrum |

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                              |

Axletech Company

Yangon, Myanmar

- Engineered clean, maintainable server-side logic and core application modules using PHP Laravel.
- Collaborated within a cross-functional squad of engineers and UI/UX designers to deliver custom features, improving overall application usability and user engagement.
- Successfully integrated diverse payment gateways and security authentications into web platforms, guaranteeing secure and compliant financial transactions.
- Troubleshoot, debugged, and resolved critical production-level bugs, enhancing software operational stability and data integrity.

### Backend Web Developer (Internship)

4 Months Internship

IrraHub

Yangon, Myanmar

- Acquired practical enterprise-level software engineering experience focusing on C# and ASP.NET Core backend frameworks.
- Participated in building prototypes, internal tooling, and basic database management scripts under the mentorship of senior technical architects.
- Gained hands-on experience in writing clean, well-documented code, participating in standard code reviews, and understanding complete SDLC paradigms.

## EDUCATION

---

### Bachelor of Computer Science (B.C.Sc.)

2013 – 2019

University of Computer Studies, Yangon (UCSY)

Yangon, Myanmar

### Diploma in English for Communication Skills

Ongoing

Yangon University of Foreign Languages  
(YUFL)

Status: Completed 3 out of 6 Levels (Commencing Level 4 on June 19,  
2026)

## CERTIFICATIONS & PROFESSIONAL COURSES

---

- Full Stack Developer Course – Code Lab Professional IT Training Center
- Professional Web Developer Course – Fairway Technology
